Introduction

Why do businesses need an Inventory Management System?

Motivation

When considering business failures, inventory mismanagement is one of the top reasons among them. Inefficient inventory management can affect the company's profitability in several ways.

- Too much stock
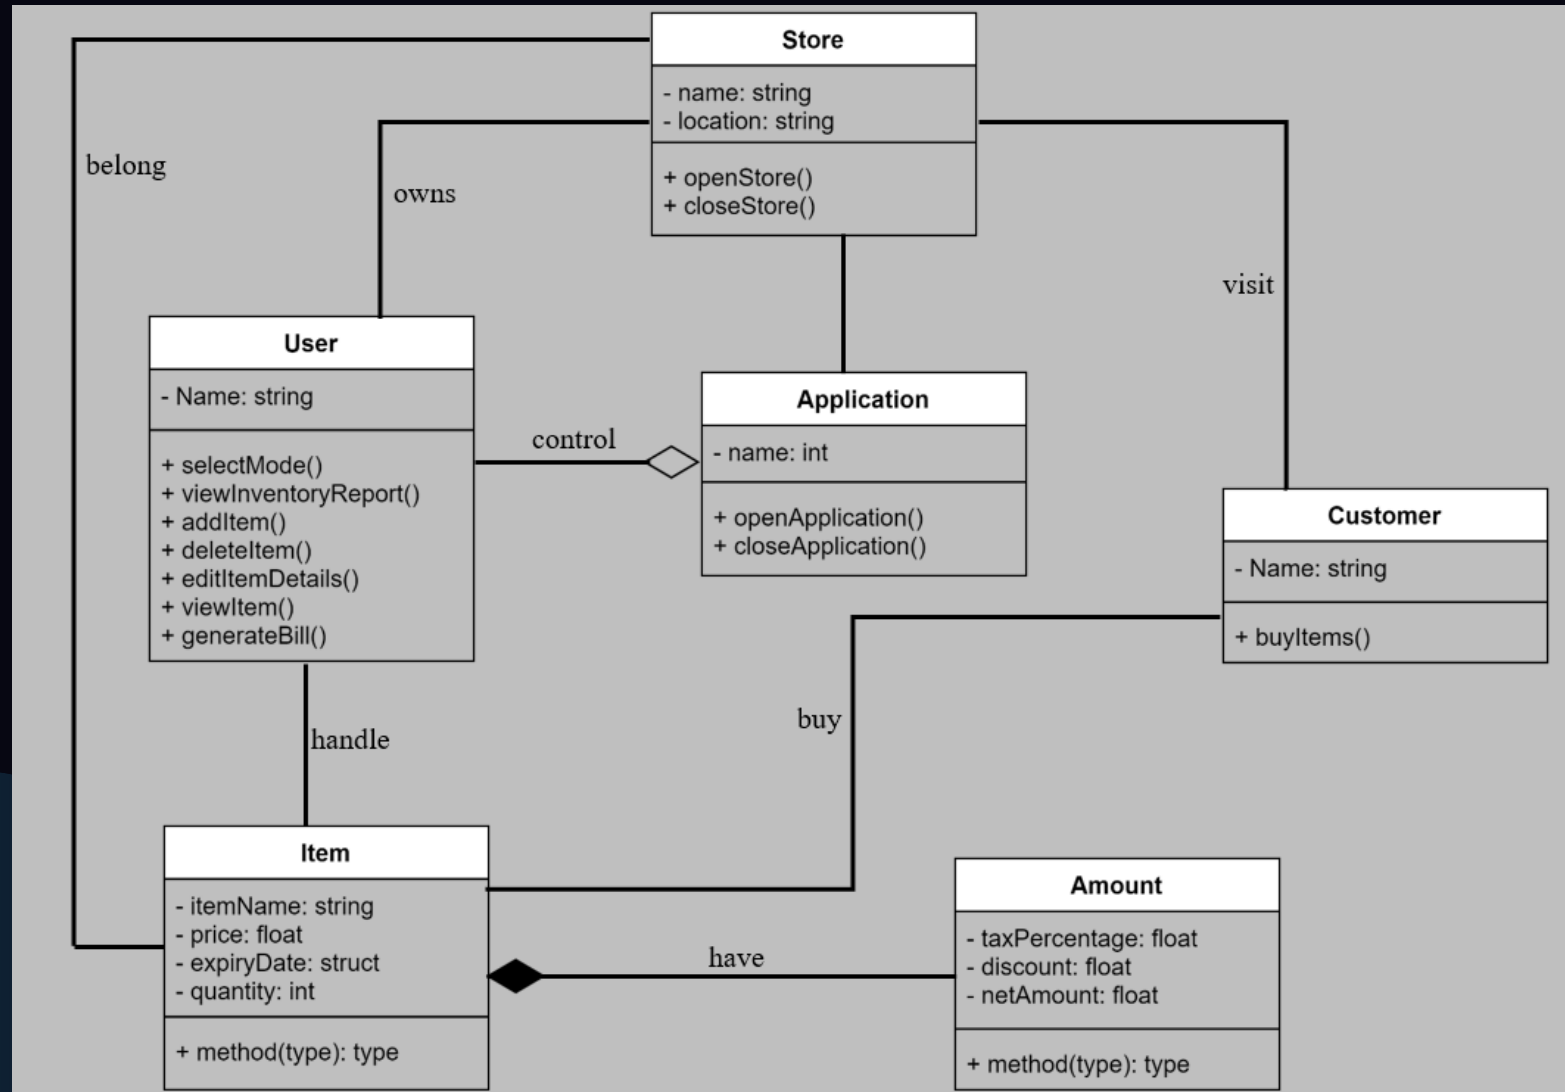

- Too little stock

- Too old stock

Objectives

- Keep track of the items available in the store.

- Enter the items along with the following attributes;

  - ✓ Item No
  - ✓ Item Name
  - ✓ Quantity
  - ✓ Expiry Date
  - ✓ Retail Price
  - ✓ Tax Percentage
  - ✓ Discount Percentage

- View the above details of an already existing item available at the store.

- Delete an item by entering its item number.

- View the list of all the available items at the store along with their total value.

- Generate a bill when a customer purchase items.

```

Usability

- Pharmacies and drugstores

- Health and Beauty care shops

- Food and Beverage shops

- Supermarkets

- Online shopping platforms

Future Improvements

❑ Add a feature to sort the items

- By name

- By price

- By expiry date

❑ Store the price history of items

❑ Use graphical user interfaces

❑ Use a database system

❑ Use a password-protected system

❑ Use a barcode system for items

Thank You.
